

Team KOASK

March 29th SCRUM

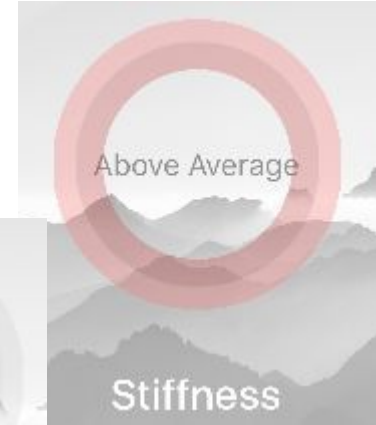

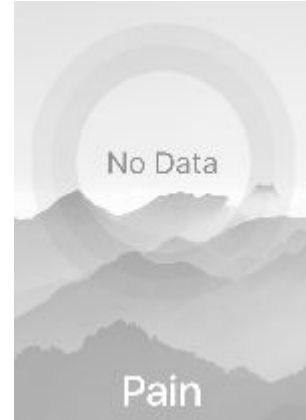

Graphs

- Survey results now connected to the graphs
- Graphs can now have 3 subviews
 - The past week, past 8 weeks, past 12 months
- Incorporated demo code to better demonstrate the use of the app
- Modified the graph time scale in an attempt to make it more intuitive
 - Newest entry is rightmost, as the past is displayed to the left of it

Circles

- Visualizations added to the dashboard screen to contextualize symptom information entered by patients.
 - Pain, Stiffness, Functional Impairment
 - Red if symptoms are worse than WOMAC average
 - Green if symptoms are better than WOMAC average
 - Grey if the user has not yet filled out any surveys

Going Forward

- Finish website
- Act upon feedback
- Finalize the Symptom Tracker landing page
- Persist the survey results
- Test and debug
- Presentation at ABJHI event on April 18
