

Team KOASK

March 15th SCRUM

Meeting With Dr. Sharif and Research Assistant

- Very happy with our work. Just a few things left to complete:
 - Implement a structural severity graph
 - Connect survey results to all graphs and circles on dashboard.
 - Implement or prototype a simple reminder system for users to re-enter symptom data.
A few options:
 - Some sort of badge indicating the number of surveys that are overdue for updating.
 - A reminder that pops up when the user opens the app.
 - A notification that appears whether or not the app is open.
 - Send him an updated screen capture demo video or make password-protected website available to him and his colleagues.
- Exercise selection, tracking, and reminder functionality is nice but not required.

Stiffness Profile

Think about the stiffness (not pain) you felt in your knee due to your arthritis during the last 48 hours. Stiffness is a sensation of decreased ease in moving your joint.

Do you feel stiffness in your knee?

Yes

No

Graphs

- Added animation
- Stylistic Choices
 - Animation frequency
 - Reference Lines
 - Background

Going forward

- Finalize the Symptom Tracker landing page
- Finish the exercise tracking screen
- Persist the survey results
- Get the survey results into the charts
- Test and debug
- Presentation at ABJHI event on April 18
